## **IMPACT '08 IDENTITY SEMINAR**

---

The fourth of seven Impact '08 ICT seminar series, of which InternetNZ is a co-sponsor, is being held on 21 July from 12 noon to 2.00pm.

The topic for the presentation is Identity. Does the sense of identity and privacy change with innovations in ICT? What is the impact on the rights of the individual when the ease of access to information becomes so easy and fast?

Speakers include Eamon Daly, Stephen Bell, David Farrar and Laurence Miller. Speaker biographies are available here: <http://www.2020.org.nz/impact/july.htm>

The seminar is being presented interactively on a national basis using Access Grid network nodes at Auckland, Waikato, Victoria, Lincoln and Canterbury universities. These are connected through the high speed KAREN network.

The Access Grid is an advanced videoconferencing system where people in different places meet in a 'virtual venue' using audio and video tools, and other shared applications.

You can register for this seminar by emailing [impact@2020.org.nz](mailto:impact@2020.org.nz) or by visiting the 20/20 Communications Trust website at <http://www.2020.org.nz/impact>

About Impact '08

The Impact '08 Seminar series explores the Social, Cultural & Ethical Impact of ICT Innovation.

The seminars are organised and funded through a partnership of UNESCO New Zealand, the 2020 Communications Trust and InternetNZ.
